BOATING MAGAZINE AWARDS FOUR WINNS H2E “BEST RUNABOUT OF 2023”

PRESS RELEASE: January 18, 2024 – Fort Lauderdale, Florida, USA – Four Winns is excited to share that the editors at Boating Magazine, one of the top publications in the boating industry, have selected the H2e as the “Best Runabout of 2023!”

“This exceptionally well-done bowrider offers style and substance in equally heavy measure.”

– Boating Magazine

Amazing Performance

It’s no secret that electric cars have exceptional acceleration on the road. This unique quality flows into the outboard motors of electric boats – specifically, the Four Winns H2e. Vision Marine Technologies holds the world record for the fastest electric boat on the water and manufactures the E-Motion electric marine powertrain for the H2e. The technology of its quick moving counterpart is shared in the innovation of the E-Motion outboard engine and since power is nothing without control, the H2e has a smooth, dedicated throttle and leather wrapped steering wheel providing exceptional control while boating. The H2e’s dual screens provide clear visibility and immediate access to all pertinent power information. With ultra bright settings, these screens ensure comprehensive monitoring of the powertrain, delivering an enhanced user experience.

“Performance wise, it delivers superior speed, handling, and ride quality.”

– Kevin Falvey, Editor Boating Magazine

Benefits of Electric Boating

With the first ever, fully electric, outboard runabout on the market, Four Winns' dedication to enhance the boating experience is elevated substantially with this fully sustainable cruising experience. Those dedicated to reducing their global footprints, now have a boating option in which carbon emissions are nearly obsolete. The electric outboard engine produced by Vision Marine Technologies, immediately improves the quality of your time on the water with family and friends by removing exhaust fumes and allowing for more conversation and laughter with the near absence of noise typically generated by its ICE counterparts. Additionally, H2e owner benefit from lower running costs as the boat is 100% powered by two (2) high voltage, high density, 43 kWh batteries that pack enough power for you to enjoy a full day out on the water and easy connectivity to conventional shore power upon your return. Long-term, H2e owners will benefit from much lower annual service costs, as the H2e requires minimal upkeep throughout the year. Additionally, the H2e will come equipped with a 1-year pre-paid subscription to SeaNapps, an app that allows you to track engine hours, maintenance needs, and more, directly from your phone.

“Just imagine jumping aboard your H2e, fully-charged and ready to go, from your trailer or private dock. No noise, no exhaust, no refueling, no hassle... just a rewarding day on the water.”

– Nick Harvey, Four Winns Brand Director

The Finer Side of Boating

While Four Winns continues to be committed to creating a comfortable and instinctive experience on the water, the brand also recognizes the need for environmentally friend solutions in the future of boating. The H-Series with electric motorization further enhances the finer side of life with the omission of exhaust fumes coupled with a nearly silent motor providing a much quieter ride that improves the ambiance while out on the water with loved ones. The instant acceleration is powerful, yet smooth, adding to the elegance of the Four Winns H2e model. As electric engines continue to increase in popularity, Four Winns is proud to be at the forefront of this direction in its partnership with Vision Marine Technologies and is elated to have received the “Best Runabout of 2023” from Boating Magazine.

About Four Winns

For almost 50 years, Four Winns has been building its international reputation as a manufacturer of refined and sophisticated pleasure crafts designed to fit all boaters' needs. Four Winns continues to be the American timeless reference in boat building. Originally from Cadillac, Michigan, its iconic image serves as a basis to consistently evolve products and features across all markets by developing style icons perfectly shaped with a love for details. With a deep commitment to a carefree, instinctive boating experience, Four Winns strives to exceed in comfort, convenience, and operation ease – a true reward as soon as one steps onboard.
